

MODO POD SOFA

designed by Vilia Jin

SEATING — SOFA

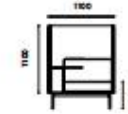

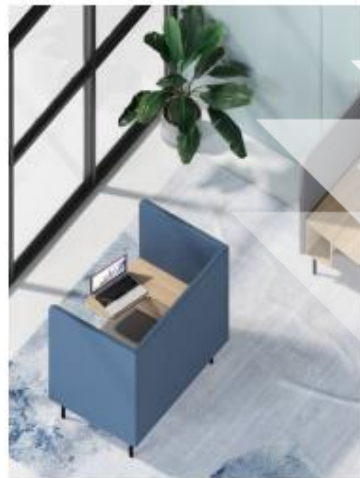

Designed in the spirit of modern leisure office, Mode Pod Sofa, compared with Modo Sofa from which it is derived, has added an enclosed upholstery screen, a writing board and power supply module to its design. The screen can protect the privacy of the users and enhance the concentration and comfort in working, while the 4-seater design can boost the efficiency and cooperation in small teams.

The wooden box module by the side is for both charging and storage. The face-to-face cubicles not only satisfy the needs of temporary negotiation and discussion among a group of people, but also serve as a support to hang display devices and the whiteboard for brainstorming.

NAME
Hive-Pod / 2-seater
