

HUG

Home Office/Traditional Office

Lightweight and home-like are the pursuit of HUG series design. Get rid of a lot of complexity, The shape, with concise lines running through the overall product design, is more suitable for matching Simple office space and colourful home space.

The HUG series is the first attempt to cancel the traditional complex chassis design and replace it with plastic. The principle of deformation realizes the swing of the overall structure, thereby reducing the quality of materials and lines. Keep it simple. On the one hand, it reduces the burden of material recycling, on the other hand, it realizes the overall design is lightweight and easy to move.

The future of work

Office or Home

Home/Remote Office

Becomes a TrendIn the post-epidemic era, people accept the efficiency improvement of home office. The rise of multiple employment methods, such as live broadcast/knowledge blogger/KOL etc. Users hope that the office space will be more home-like and colorful. Public collaboration places are more flexible and diverse, the HUG series emergence is meeting that need.

Light Task Chair

Adjustable headrest

The headrest fabric is high-quality leather, which can go up and down along the track of the headrest bracket. The headrest can be lowered, and the headrest can also be adjusted by turning around the components on the headrest bracket angle.

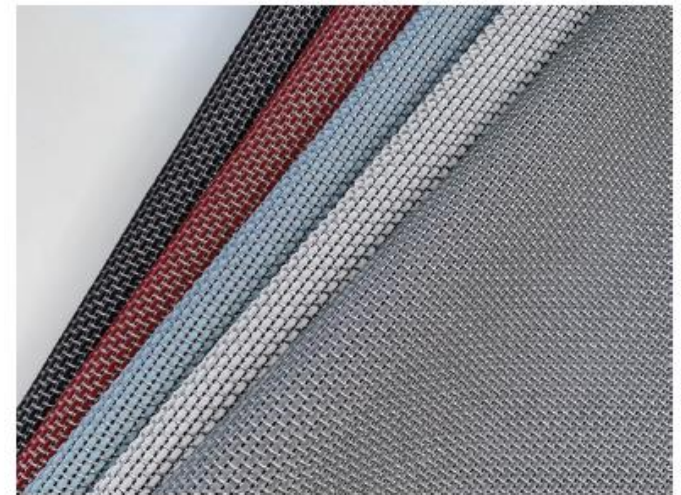

Home Fusion in Commercial Space

In order to improve office efficiency, home office allows employees to better integrate into the office.

The rise of the environment, home furnishing fabrics and seating forms.
